Professional Summary

Motivated and self-driven Full Stack Developer with hands-on experience in building modern web applications using Laravel, Vue.js, PHP, MySQL, and REST APIs. Experienced in developing real-world CRUD systems, authentication workflows, admin dashboards, drag-and-drop interfaces, and API-based applications. Worked on freelance learning projects, client-style applications, and college development projects with a strong focus on problem-solving, clean architecture, and responsive UI design. Quick learner with strong communication skills, adaptability, and passion for backend and full-stack development.

Technical Skills

Backend	PHP, Laravel, REST APIs, Laravel Sanctum, MVC Architecture
Frontend	Vue.js 3, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS
Database	MySQL, Eloquent ORM, Database Relationships
Tools	Git, GitHub, Vite, Axios, Postman
Concepts	Authentication, Authorization, CRUD Operations, API Development, Pagination, File Uploads,
Soft Skills	Communication, Problem Solving, Team Collaboration, Fast Learning, Debugging, Adaptability

Experience

Freelance & Client Projects Developer

- Developed full-stack web applications and backend systems for learning projects, client-style tasks, and freelance practice work.
- Built secure authentication systems, REST APIs, admin dashboards, and responsive interfaces using Laravel and Vue.js.
- Worked on task management systems, blog platforms, CRUD applications, and API-based architectures.
- Integrated features such as drag-and-drop task management, file uploads, pagination, search filtering, and role-based authorization.
- Improved debugging, API integration, database management, and frontend-backend communication skills through real-world practice projects.

Projects

Laravel Blog Application

Tech Stack: Laravel, PHP, MySQL, Bootstrap, Sanctum, PHPUnit
GitHub: github.com/theone14122000/demo-blog-app-laravel

- Developed a complete blog platform with authentication, profile management, post creation, comments, likes, and admin dashboard.
- Implemented REST APIs with Laravel Sanctum authentication for secure API access.
- Used Laravel Policies, Middleware, Form Requests, and Service Classes for clean architecture and

authorization handling.

- Added search functionality, pagination, CRUD operations, and role-based access control.
- Practiced real-world Laravel concepts including Eloquent ORM, database relationships, and API development.

Task Manager Application (Laravel + Vue 3)

Tech Stack: Laravel, Vue 3, TypeScript, Tailwind CSS, MySQL, Sanctum

GitHub: github.com/theone14122000/task-manger-vue-laravel

- Built a modern full-stack Kanban-style task management application using Laravel REST APIs and Vue 3 frontend.
- Implemented drag-and-drop task management using VueDraggable with automatic task reordering.
- Developed features such as task CRUD operations, file uploads, authentication, filtering, pagination, dashboards, and dark mode UI.
- Created admin dashboard for task management, statistics tracking, and user task monitoring.
- Worked with API-based architecture, responsive frontend design, and frontend-backend integration using Axios.

Education

B.Tech in Computer Science Engineering

Green Hills Engineering College – Graduated in 2023

CGPA: 6.8

12th (ICSE Board)

Himalayan International School – 2018

10th (ICSE Board)

Himalayan International School – 2016
